# Manual Review

High Level Risk: N/A

Med Level Risk: N/A

Low Level Risk: N/A

Informational Level Risk: N/A

# Disclaimer:

This assessment report has been meticulously crafted by Audit 69's team at the behest of our client or general information.

It encompasses a comprehensive evaluation comprising static analysis and manual code review components. The core objective of this audit is to validate the functionality of the smart contract's features and to pinpoint any potential security vulnerabilities.

The insights presented in this report are designed to shed light on the inherent risks associated with the smart contract. It serves as a roadmap, offering suggestions for potential enhancements to the development team by addressing identified issues.

It's essential to clarify that Audit 69 assumes no liability in cases of project misrepresentation, fraudulent activities, or deceptive tactics. Our role is strictly confined to delivering a thorough analysis for your independent review.

We emphasize that Audit 69 cannot be held responsible for any financial losses incurred. It's imperative to conduct thorough research as the information provided herein does not constitute financial advice.

This audit report is intended solely for informational purposes and should not be misconstrued as investment advice. Audit 69 neither endorses nor encourages investment in any project.

In situations where a project is found to be fraudulent or deceptive, Audit 69 cannot be held liable.
